Note: The MLS median price and sales data in the table below are generated from a survey of more than 90 associations of REALTORS® throughout the state, and represent statistics of existing single-family detached homes only. sales data are not adjusted to account for seasonal factors that can influence home sales. Movements in sales prices should not be interpreted as changes in the cost of a standard home. Median prices can be influenced by changes in cost, as well as changes in the characteristics and the size of homes sold. Due to the low sales volume in some areas, median price changes may exhibit unusual fluctuation.
