STATEMENT

As a 20 year civil litigator, I can state firsthand that mediation is the most effective means to reach a mutual and amicable settlement between two or more disputing parties. I have participated in more mediations than I can count, and have been able to successfully resolve 90% of them. Litigation in the current California court system can drag out for years, even over small disputes; whereas I can usually effectively settle a case quickly in mediation by calmly and rationally explaining, through my vast first hand experience, the reasons why parties are much better off working out a resolution in mediation as

opposed to a drawn out litigation process. With my vast knowledge of the law, as well explaining the likely outcomes should the parties attempt litigation, most mediations I handle result in settlement.
